NSP AIRWAVE	¥158,000			
NSP AIRWAVE PACAGE FW78 & FW85	¥210,000			
NSP FRONT WING 85	¥72,000			
MSP MAST 60cm	¥18,000			

■ AIRWAVE
MOUNTING PLATE (aluminum base)

Designed to spread the load, the anodized aluminum base features screw slots instead of holes, allowing for additional fine tuning.

MAST

Built from anodized aluminum, the 70cm mast minimizes drag and maximizes stiffness.

FUSELAGE (70cm aluminum)

The centerpiece of the foil, this hydrodynamically shaped fuselage measures 70cm. Made of anodized aluminum, it slots seamlessly onto the mast and holds the front wing, the back wing and the tuning shims.

FRONT WING

The pre-preg carbon front wing spans 78cm and is 22cm wide with a total size of 1,325 square cm. Three screws hold the front wing in place.

REAR WING

The pre-preg carbon front wing spans 39.5cm and is 11 cm wide with a total size of 330 square cm. The back wing attaches to the fuselage with two screws
