

SURFTECH

30+ YEARS OF INNOVATIONS

Superior DURABILITY, PERFORMANCE, AND TECHNOLOGY has always been Surftech's core values. To ensure we are always offering the most advanced boards in the world, we work with the premier craftsmen in our industry. There is no substitute for the knowledge and design capabilities of each of our partner shapers who individually have spent decades testing and refining their templates. As we celebrate our 31st year of innovation, we are poised to embark on the next 30 years of pioneering surf, stand up paddling, and prone paddling with a number of new technologies, products and programs. Each one of our boards represent the pinnacle of their designs, retaining unique attributes that make them stand out beyond all other boards on the market.

Jerry Lopez

FUSION-E2 CONSTRUCTION

1. **Fused Cell EPS Core (Dual-Core)**
// Closed cell EPS core provides more response + Flotation
2. **Clear HD-Epoxy Resin**
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**
// E-glass has the highest strength to weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**
// The Biax fiberglass distributes power + protects from dings
5. **UD Carbon Stringer**
// Distributes power + protects from dings + adds break strength
6. **UD Carbon Tail Patch**
// Distributes power to the fins + protects from toe/heel dings
7. **FCS II Fin Boxes**
// Takes just seconds to insert and remove the fins
8. **Exclusive to SHARP EYE Boards**
// The Fusion-E2 construction is Exclusive to SHARP EYE

FUSION POLY CONSTRUCTION

1. **PU Core**
// High-density polyurethane core for performance and feel
2. **PE Resin**
// Advanced polyester resin for strength and flex
3. **6oz Fiberglass w/4oz Patch**
// E-glass has the highest strength-to-weight ratio
4. **Wood-Ply Stringer**
// Natural wood fibers creates a natural flex and adds break-strength
5. **FCS II Fin Boxes**
// Takes just seconds to insert and remove the fins
6. **Full Biax Deck Patch (45° / -45°)**
// Adds strength and durability plus tint creates a unique look
7. **Gloss and Polish Finish**
// High gloss finish to turn some heads on your paddle out

FUSION HD CONSTRUCTION

1. **Fused Cell EPS Core**
// Closed-cell EPS core provides more response + flotation
2. **Clear HD-Epoxy Resin**
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**
// E-glass has the highest strength-to-weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**
// The Biax fiberglass distributes power + protects from dings
5. **UD Carbon Stringer or Wood Stringer**
// E-glass has the highest strength-to-weight ratio available
6. **FCS II Fin Boxes**
// Takes just seconds to insert and remove the fins
7. **Hand-Finished**
// Machine-shaped, hand-laminated, and hand-finished

FUSION PARABOLIC CONSTRUCTION

1. **Fused Cell EPS Core**
// Closed-cell EPS core provides more response + flotation
2. **Clear HD-Epoxy Resin**
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**
// E-glass has the highest strength-to-weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**
// The Biax fiberglass distributes power + protects from dings
5. **Parabolic UD Carbon Stringer**
// Distributes power + adds parabolic flex + adds break strength
6. **FCS II Side Bite Fin Boxes**
// Takes just seconds to insert and remove the fins
7. **Exclusive to Walden Boards**
// The Fusion-Parabolic construction is Exclusive to Walden Surfboards
8. **Hand-Finished**
// Machine-shaped, hand-laminated, and hand-finished

DUAL-CORE CONSTRUCTION

1. **Fused Cell EPS Core (Dual-Core w/PU Rails)**
// Closed cell EPS core provides more response + Flotation
2. **Clear HD-Epoxy Resin**
// Epoxy resin system with high thermo-mechanical performances
3. **High Quality E-Glass Fiberglass**
// E-glass has the highest strength to weight ratio available
4. **Full Biax Deck Patch (45° / -45°)**
// The Biax fiberglass distributes power + protects from dings
5. **Pop-Flex Stringer (TPU)**
// TPU adds pop + feel / EVA adds dampening + feel
6. **PU Foam Rail Inserts (Dual-Core w/EPS Center)**
// PU rails adds drive in and out of turns + swing weight for airs
7. **Carbon Stringer**
// Distributes power + protects from dings + adds break strength
8. **Carbon Tail Patches**
// Distributes power to the fins + protects from toe/heel dings
9. **Patented Technology**
// An exclusive technology by Surftech

TUFLITE CONSTRUCTION

1. **Fused Cell EPS Core**
// Closed cell EPS core provides more response + Flotation
2. **GreenPoxy® Resin**
// The latest innovations in bio-based Epoxy chemistry
3. **2x Layers Fiberglass**
// E-glass has the highest strength to weight ratio available
4. **Micro-Sandwich Veneer**
// Wood Veneer creates natural flex + adds break strength
5. **Composite T-Stringer(s)**
// T-Stringers add power distribution + adds break strength
6. **Carbon Stringer**
// Distributes power + protects from dings + adds break strength
7. **Carbon Tail Patches**
// Distributes power + protects from dings + adds break strength
8. **Reinforced Rails**
// Fiberglass reinforced rails enhances performance + durability
9. **Exclusive Sandwich Technology**
// Surftech Tuflite boards are molded with exclusive methods

SOFTOP® CUSTOM-PERFORMANCE

1. **Fused Cell EPS Core**
// EPS core provides more response + flotation
2. **HD-Epoxy Resin**
// Epoxy resin with high mechanical performances
3. **2x Layers Fiberglass**
// E-glass has the highest strength to weight ratio available
4. **Micro-Sandwich Veneer**
// Wood Veneer creates natural flex + adds break strength
5. **Double Wood Stringers**
// Stringers add power distribution + adds break strength
6. **Thermal Debossed EVA Deck Pad**
// The full EVA deck pad gives you traction + adds durability
7. **Hard Fiberglass Bottom**
// The Fiberglass bottom keeps the contours which = performance
8. **Reinforced Rails**
// Fiberglass reinforced rails enhances performance + durability

Marcio Zouvi

Established in 1992, Sharp Eye® surfboards has made it's name with an unprecedented commitment to consistency, quality and customer service.

Since its beginning, founder Marcio Zouvi has had the vision of creating a surfboard company that would have an open door policy for the customer and establish a friendly environment in which the surfer's satisfaction is the number one priority.

Gerry Lopez grew up in the extraordinary place that was Hawaii in the 1950s and 1960s. He played a part in the shortboard revolution of the late 1960s and early 1970s. He experienced the awe, fear and ultimate satisfaction of finding the tube in the early days at the Pipeline. He traveled for surf throughout the world: to the original surf camp at G-Land, the exotic islands off Sumatra and especially to the magic island of Bali, Indonesia - before it became a popular surf destination. He experienced the beginnings of windsurfing on Maui, the early years of snowboarding and tow-in surfing at Jaws.

Fast forward to today and Gerry Lopez is shaping some truly unique boards that keeps his surfing journey moving forward. This collection of boards represents the quiver that he takes around the world to surf the ultimate breaks.

Donald Takayama's legacy is a combination of the world's best boards, best surfers and best waves, making his boards some of the most sought after in the surfing world. Takayama was famous for his progressive designs that combined both traditional and high-performance aspects into every board made. As a result, the best surfers chose his boards to bring their surfing to the next level. Donald Takayama and Surftex worked together for over 20 years before his passing, with a relationship built on trust and a commitment to produce quality products that compliment the designs he so passionately created.

Since 1969, Channel Islands Surfboards (CI) has been dedicated to performance and quality through hard work, innovation, and originality. CI Surfboards was created by Al and Terry Merrick in 1969. Now, Britt Merrick is the lead shaper and designer for CI and carries on the family tradition of developing high-performance board designs collaborating with the world's greatest surfers. From Shaun Thomson, to Dane Gudauskas, CI continues to evolve with the highest standard of surfing. Surftech is proud to partner with CI to bring Surftech's art of technology to their proven shapes.

NEW
Brand

Ben Aipa

- A LEGACY OF ALOHA -

Ben Aipa has made a most significant mark in the world of surfing: making the board that fellow Hawaiian Fred Hemmings used to win the World Championship in 1968 and founded his own brand Aipa Surfboards in 1970. Ben invented the doubled-edged swallowtail design in 1972 and followed this with the split-tail design in 1974. Moreover, Ben has served as an informal coach and trainer to such top surfers as Michael Ho, Larry Bertleman, Mark Liddell, Sunny Garcia, Brad Gerlach, and Kalani Robb.

"I WAS NEVER WATCHING WHAT OTHER BOARD BUILDERS WERE DOING... I WAS WATCHING THE SURFERS AND THE NATURAL WORLD AROUND ME. THEIR MOVEMENTS SHOWED ME WHAT WAS MISSING... I WAS ALWAYS LOOKING FOR THE NEXT WAVE... THE NEXT MOVE." – Ben Aipa

Ben Aipa continued to enter and compete in various surfing contests: He won the grandmasters division of the 1989 United States Surfing Championship and the legends division of the 2000 U.S. Championships. Inducted into the Surfing Hall of Fame in 1992, Ben was named one of the Top Ten Shapers of All-Time by Surfing magazine in 2004.

Rider : Colin McPhillips
3 x WORLD CHAMP.
Board : MAGIC FUSION POLY 9'6"

Steve Walden shaped his first surfboard in 1961, at age 13, and never looked back. Eight years later, the native Southern Californian opened his first board factory and store in Huntington Beach, then moved to the North Shore of Oahu in 1972, where he made a name for himself as a prolific longboard shaper. While the rest of the surfing world was fixated on short single-fins, Walden continued to faithfully hone his longboard designs. Over the years he shaped for prestigious labels like Lightning Bolt, Local Motion, HIC, and Channel Islands, but it was always his own boards that set him apart. By the early 80s, Walden returned to California where he unveiled his wildly successful Magic Model with its radical rocker, down-turned rails, unique bottom curve & bevels, and super-fast bottom contour. With arguably the most advanced and high performance longboards on the market, Walden was uniquely positioned to capitalize on the resurgence of longboarding in the late 80s and 90s. To date, Walden estimates he's personally shaped more than 20,000 boards. These days, when he's not mowing foam, Walden is surfing. Though he competed some as a teenager, he returned to contest surfing at the age of 30 and has been a regular on the podium ever since. In fact, Walden still holds the record for the longest noseride in competition history with an epic 25.5-second ride.

Mickey Muñoz

Mickey Muñoz has been shaping and designing boards for nearly half a century. The Muñoz name is well respected in the global surfing community and his positive attitude, from his very first wave to this day, makes him the consummate ambassador of surfing's true stoke. The Ultraglide and Superglide are two of Mickey's tested, tried and true designs, combining glide and maneuverability in fluid longboard shapes that bring heaps of fun to any lineup.

Bill Stewart is regarded by most as the Father of the "Modern" longboard. His innovative Hydro Hull design, which features Bill's iconic beveled rail, distinctive single to double concave bottom, and a 2+1 fin setup, still sets the pace in high-performance longboarding decades later. The result is a faster harder turning board that is more forgiving. The Hydro Hull is a timeless design that will never go out of style with knowledgeable high-performance longboarders around the world.

The Softop® Custom-Performance Series of boards designed by the most innovative shapers and coupled with Surftect's legendary Softop construction. Surftect's Softop series of boards has proudly been the #1 surf school, rental, and consumer choice for more than two decades, thanks to the durability, ease of use, and proven shapes. The Softop-CP line utilizes a Micro-Veneer, EPS / epoxy construction, and is topped with durable thermal-formed EVA deck pad. The result is a durable and forgiving board with the performance aspect you are looking for. To make sure you get the best of the performance aspect of these boards, we coupled our technology with timeless shapes from **Marcio Zouvi (SHARP EYE)**, **Donald Takayama**, **Gerry Lopez**, **Steve Walden** and **Bill Stewart**. These unique models are the first of their kind and we are proud to partner with these prestigious shapers for you to shred for years to come.
